

FCC,

Please reject NAB's petition (04-160) to stop XM's ability to broadcast traffic and weather reports. No where on the 'radio dial' does anyone do a better and more complete job of providing such a service than does XM. Their Instant Traffic & Weather service is and has been a very welcomed addition to my daily commute. Clearly XM has identified a need and is filling it. Surely NAB can do the same if they are concerned about market share.

Sincerely,  
Gary Lee
